

# Develop A User Interface

Rishabh Maheshwari

19BCY10145

Develop a User Interface to display the sensor data, configure the buttons for controlling the actuators.

1. Sign In to MIT App Inventor using your G-Mail credentials.

2. Click on Start a New Project. Name it and Start adding User Interface Components available in the app.

The user Layout will be visible on a device of your choice. Add all the components as you want from the available media , interface and animations. Align the using Layout.

3. The use interface should now Look like this
