Explore the IoT platform Architecture. Introduction to IBM Cloud platform and different services of IBM Cloud.

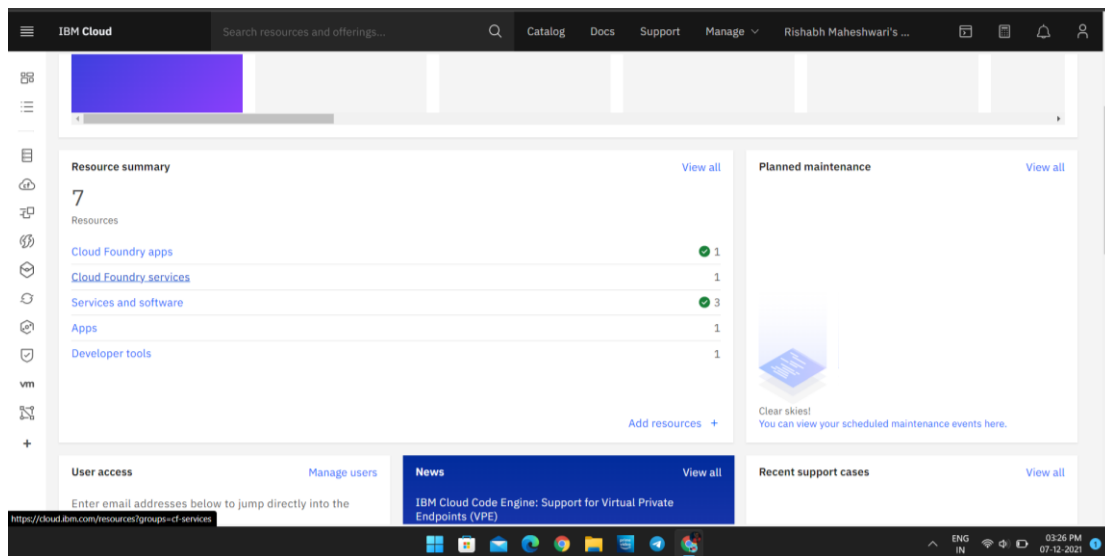

1. Create an IBM Cloud (Trial) Account and login using the credentials.

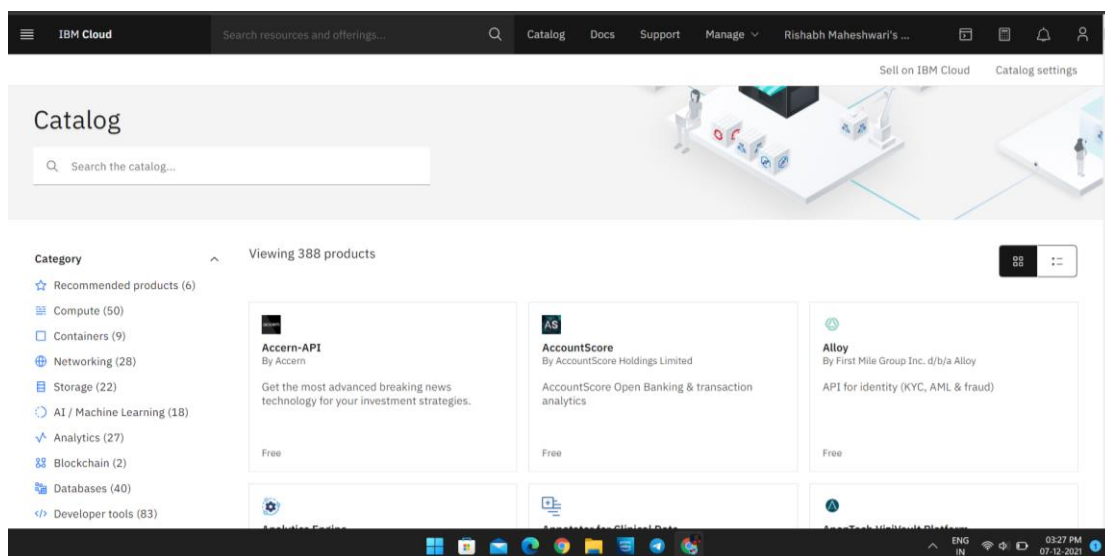

2. Open Dashboard and Explore.

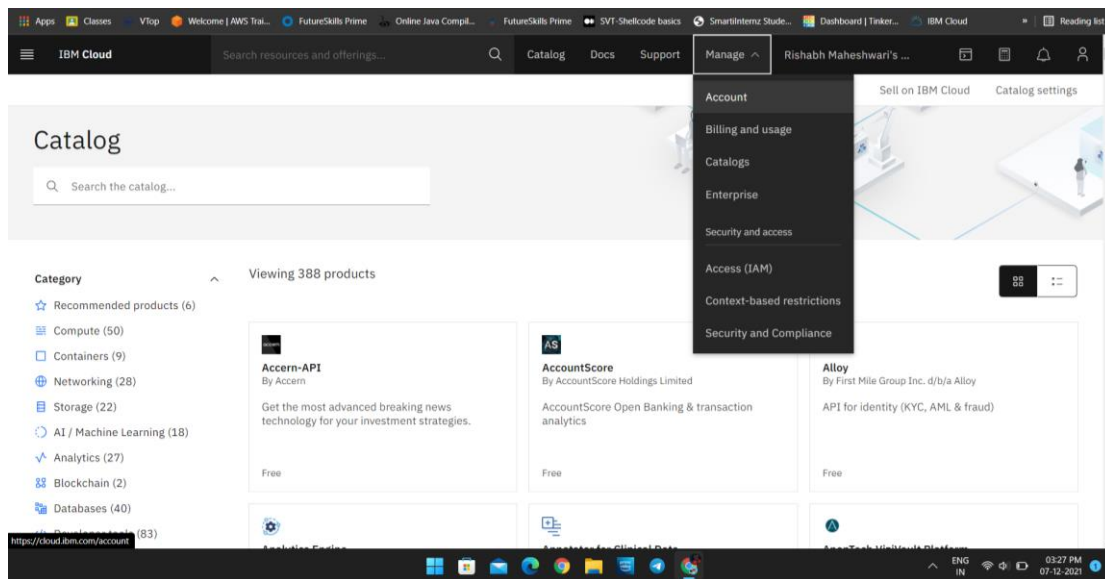

3. For the first time the Resources Card would be empty. This is where all the Services and Tools are Displayed.

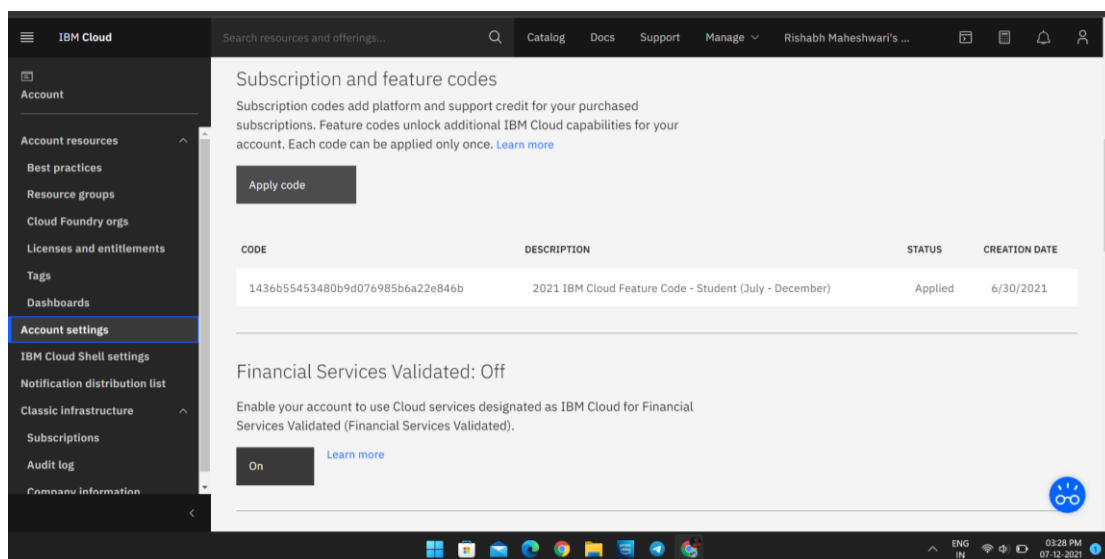

4. To get or create Services click Catalog option from the top Menu. You can search any resources which are provided by the Cloud Service.

5. To manage Account Settings go to Accounts option in the Manage drop down menu.

6. Open Account Settings and generate a key using API and Paste it in the Subscription and feature codes Section and select Trial Account.

7. Rest all services would be visible on the Dashboard just as same.
